Content Curation & AI Idea Generation Platform

"Inspire to Create"

Target Platforms	Focus Area
KaamyabPakistan.org	Business opportunities for Pakistani entrepreneurs
YouInvent.Tech	Technology innovations and inventions
HomeFranchise.Biz	Home-based franchise opportunities
NoCodeAI.Cloud	No-code AI solutions and tools

Version 1.0 | December 03, 2025

1. Executive Summary

A unified platform that allows users to capture inspiring content from social media (Instagram, TikTok, YouTube) and websites, automatically transcribe it, and use AI to generate new business ideas tailored to specific target platforms.

Key Features:

- One-Click Capture - Browser extension to save content instantly
- Multi-Platform Auth - Connect Instagram, TikTok, YouTube accounts
- Auto-Transcription - Speech-to-text for videos, OCR for images
- AI Idea Generator - Gemini-powered contextual idea creation
- Platform Targeting - Customize ideas for specific audiences
- Export Options - PDF, Word, direct publish to platforms

2. Supported Content Sources

Platform	Content Types
Instagram	Posts, Reels, Stories
TikTok	Videos
YouTube	Videos, Shorts
Websites	Articles, Blog posts

3. User Flow

Content Capture Flow:

1. User browses Instagram/TikTok/YouTube/Website
2. User clicks browser extension OR pastes URL in web app
3. System authenticates user (OAuth 2.0)
4. Content is fetched and stored
5. Automatic transcription begins
6. User receives notification when ready

Idea Generation Flow:

1. User views transcribed content

2. User selects target platform (e.g., YouInvent.Tech)

3. User clicks 'Generate Ideas'

4. AI analyzes content + platform context

5. Multiple idea variations generated

6. User reviews, edits, and saves preferred idea

7. Idea exported to target platform database

4. AI Capabilities

Capability	Technology	Use Case
Video Transcription	Google Speech-to-Text	Convert spoken content to text
Image Text Extraction	Google Vision OCR	Extract text from images
Content Analysis	Gemini Pro	Understand context and themes
Idea Generation	Gemini Pro	Create business opportunities
Translation	Google Translate	Urdu/English support
Sentiment Analysis	Natural Language API	Gauge content tone

5. Platform-Specific AI Prompts

YouInvent.Tech Prompt:

"Based on this content, propose an innovative technology solution or invention. Consider: Technical feasibility, Market potential, Patent possibilities, Development complexity, Scalability"

KaamyabPakistan.org Prompt:

"Analyze this content and generate a business opportunity suitable for Pakistani entrepreneurs. Consider: Local market conditions, Available resources, Cultural relevance, Investment requirements, Job creation potential"

HomeFranchise.Biz Prompt:

"Transform this inspiration into a home-based franchise concept. Consider: Work-from-home viability, Startup costs under $10,000, Training requirements, Scalability through franchising"

NoCodeAI.Cloud Prompt:

"Create a no-code AI tool concept inspired by this content. Consider: User-friendly interface, AI/ML capabilities needed, Integration possibilities, Subscription model potential"

6. GCP Services Required

Service	Purpose	Est. Cost/Month
Cloud Run	API hosting, web app	$20-50
Cloud Functions	Content processing	$10-30
BigQuery	Data storage & analytics	$10-20
Cloud Storage	Media files storage	$5-15
Speech-to-Text	Video transcription	$20-50
Vision API	OCR for images	$10-25
Vertex AI (Gemini)	Idea generation	$15-40
Cloud Scheduler	Background jobs	$0.10/job

7. Implementation Phases

Phase 1: Foundation (Week 1-2)

- Set up GCP project structure
- Create BigQuery dataset and tables
- Build basic Cloud Run API
- Implement user authentication

Phase 2: Content Capture (Week 3-4)

- Develop browser extension
- Integrate YouTube Data API
- Build web scraper for websites
- Create content library UI

Phase 3: Transcription (Week 5-6)

- Integrate Speech-to-Text API
- Integrate Vision OCR API
- Build transcription queue
- Add transcription viewer

Phase 4: AI Generation (Week 7-8)

- ■ Create Gemini integration
- ■ Build prompt templates per platform
- ■ Implement idea generation pipeline
- ■ Create idea scoring system

Phase 5: Export & Polish (Week 9-10)

- ■ Build PDF export functionality
- ■ Create platform export APIs
- ■ Add idea library search
- ■ Implement analytics dashboard

8. Cost Estimation

Item	Low Usage	Medium Usage	High Usage
Cloud Run	$20	$40	$80
Cloud Functions	$10	$25	$50
BigQuery	$10	$20	$40
Cloud Storage	$5	$15	$30
Speech-to-Text	$20	$50	$100
Vision API	$10	$25	$50
Gemini API	$15	$40	$80
TOTAL	**$90**	**$215**	**$430**

9. Future Enhancements

- Mobile App - iOS/Android native apps
- Team Collaboration - Share ideas with team members
- AI Training - Custom fine-tuned models per platform
- Marketplace - Buy/sell generated ideas
- Analytics Dashboard - Trend analysis and insights
- Multi-language - Support for Urdu, Arabic, Hindi

10. Monetization Options

- Freemium model (5 ideas/month free)
- Pro subscription ($9.99/month)
- Enterprise plans for teams
- Per-idea generation credits

Conclusion

This platform bridges the gap between social media inspiration and actionable business ideas. By leveraging GCP's powerful AI services (Speech-to-Text, Vision, Gemini), we can automate the tedious

process of content analysis and idea generation, allowing entrepreneurs to focus on execution rather than ideation. The modular architecture ensures scalability, while the platform-specific prompts guarantee relevant, contextual ideas for each target audience.
